

**MinEx submission on the Modified Application of Controlled Substance Licence Requirements for Specified Class 1 Substances, May 2023. Submitted 17 May 2023.**

**Please add any general comments about the proposed safe work instrument:**

Generally, we support the modified Safe Work Instrument.

Reference should be made to the United Nations Model Regulations for the Transport of Dangerous Goods accepts Electronic Detonators. (<https://www.aeig.org.au/united-nations-model-regulations-for-the-transport-of-dangerous-goods-accepts-electronic-detonators/>)

**Please add any comments about the proposal to add these specific class 1 substances to Table 1 Schedule 7 (Substances that require controlled substance licence) of the Health and Safety at Work (Hazardous Substances) Regulations 2017 (the Regulations):**

The following products are used in New Zealand and need to be added to Table 1 Schedule 7:

- UN0500 - Detonator assemblies, non-electric for blasting. This one is related to UN0360 but picks up UN0500 when it is a DG1.4S carton.
- UN0513 - Detonators, Electronic programmable for blasting.

**Please add any comments about the proposal to correct the UN number of the substance Detonators, non-electric (for blasting) to table 1 Schedule 7:**

No comment

**Please add any comments about the proposal to add the specified class 1 substances to Table 2 Schedule 7 of the Regulations (Substances that do not require controlled substance licence):**

No comment

**Do you have any comments about the application of controlled substance licence requirements to any other substances currently in Tables 1 or 2 of Schedule 7? We would appreciate any detail you can provide to support your comments:**

No comment

**Are there any substances not currently captured in Tables 1 or 2 that should be? If so, please identify and provide the substance name, HSR number, UN number, and hazard classification. You can find this information at Approved hazardous substances with controls.**
